Muhammad Fadhillah

Yogyakarta | dhillmuh@gmail.com | linkedin.com/in/muhammad-fadhillah-6b5536349/ | github.com/fadhillah714

Informatics undergraduate student at Universitas Ahmad Dahlan with a strong interest in Artificial Intelligence and Natural Language Processing (NLP). Gained hands-on experience through academic projects involving text processing, information retrieval, machine learning, and chatbot development. Familiar with Python and its libraries for data processing and machine learning implementation, as well as Laravel for web application development. Seeking an internship opportunity in AI or NLP to apply my technical knowledge, develop practical skills, and contribute to the development of intelligent applications.

EDUCATION

Universitas Ahmad Dahlan

Bachelor of Informatics | 2023 - Present
Yogyakarta, Indonesia

- Expected Graduation: 2027
- GPA: 3.65/4.00 (Through Semester 6)
- Relevant Coursework: Data Mining, Deep Learning, Natural Language Processing, Machine Learning, and Software Engineering

PROJECTS

JogjaTouch - Website Development Project

April - August 2026
Role: Project Manager / Team Leader
Technologies: Laravel, PHP, MySQL, HTML, CSS, JavaScript, Filament

- Led a team in developing a business portfolio and service website for JogjaTouch, a technology and creative service provider. Coordinated project planning, task distribution, team communication, and development progress to ensure the project was completed according to its objectives.

Chatbot Cafe - Machine Learning-Based Chatbot

July 2026
Independent Project | NLP Practicum
Technologies: Python, MLPClassifier, FastText, FastAPI, Laravel, PHP, Jupyter Notebook

- Developed a chatbot using a Multi-Layer Perceptron (MLP) classifier and pretrained FastText word embeddings for natural language processing. Implemented the machine learning model in Python, exposed its functionality through a FastAPI service, and integrated it with a Laravel-based web interface.

Olist E-Commerce Analytics - Interactive Dashboard

October 2026
Independent Data Science Project
Technologies: Python, Pandas, NumPy, Matplotlib, Streamlit

- Analyzed the Olist e-commerce dataset to identify trends in order transactions, payment patterns, customer reviews, and delivery performance. Performed exploratory data analysis and developed an interactive Streamlit dashboard with dynamic filters and visualizations to present business insights.

ACHIEVEMENTS

Bagus#3 Machine Learning - Practically! Bootcamp
Kelas Bagus | 2025

3rd Place, Bagus#3 Machine Learning - Practically! Hackathon
Kelas Bagus | 2025

ORGANIZATIONS

Himpunan Mahasiswa Informatika - Universitas Ahmad Dahlan
Staff, Ethics and Religion Department | 2025–2026

- Organized monthly Safari Al-Kahfi activities held on Thursday nights.
- Participated in fundraising and donation drives for orphanages, collecting both monetary and in-kind contributions.
- Volunteered to teach Quran recitation to children at a local TPQ (Quranic learning center).

SKILL

- **Language Skills:** Indonesian Native, Arabic Intermediate, English Basic
- **Programming Languages:** Python, PHP, SQL, C++
- **Machine Learning & AI:** Machine Learning, Deep Learning, MLPClassifier, Scikit-learn, TensorFlow, PyTorch
- **Data Science & NLP:** Natural Language Processing, Information Retrieval, Data Mining, Exploratory Data Analysis (EDA), FastText
- **Libraries & Tools:** Pandas, NumPy, Matplotlib, Jupyter Notebook, FastAPI, Streamlit, Laravel, MySQL, Git, GitHub
- **Soft skills:** Problem Solving, Analytical Thinking, Teamwork, Communication, Adaptability
- **Software & Tools:** Laravel, MySQL, Scikit-learn, Pandas, NumPy, Jupyter Notebook, Git, GitHub, VS Code, Canva, CapCut, Krita
